Bulletin No 08-8

Product Bulletin

Product: CS1000 P4 Core Drill Rig
Area: **Wireline Winch c/w Levelwind 3760013369**

Atlas Copco Exploration Products is issuing this bulletin to notify customers that we have made available the following Levelwind option for our CS1000 P4, P6 and P6L Drill Rig. The part number for the **NEW** Levelwind would be **3760012319**.

Please note that if the customer wants to add the levelwind to an existing wireline winch, a modification to the existing wireline is needed. This modification requires drilling and tapping a hole into the drum shaft, and the installation of an adapter. A field kit for this procedure is available and would be supplied with the Levelwind. We are also able to supply the entire winch complete with the levelwind under part number 3760013369.

Atlas Copco Exploration Products, a division of Atlas Copco Canada Inc.

--	---	--	---

This option has provided improved wireline management and extended the life of the wireline. There is only routine maintenance on the levelwind and the parts have been tested and proven.

Modification instructions can be made available if required. Please contact Dennis Groulx at dennis.groulx@ca.atlascopco.com

.

Sincerely,

Paul Brear
